Keywords: Domain Manager Backorders Monitoring List

You can customize the columns that display in the Backorders and Monitoring list in the Domain Manager by adding or removing column headings and changing the order in which columns display. However, you cannot remove the Domain Name and Status columns, and you cannot change the position in which the Domain Name column displays. To Customize Columns for the Backorders and Monitoring List Log in to your [Account Manager](#). In the **My Products** section, click **Manage Domains**. From the **Tools** menu, select **Customize Backorders and Monitoring Grid**. To add columns, from the **Available Headings** list, click the column heading you want to add and drag it to the **Column Heading Order** list. To remove columns, from the **Column Heading Order** list, click the column heading you want to remove and drag it to the **Available Headings** list. To change the order in which columns display, select the column heading you want to move and drag it to a new position in the list. Click **OK**.
