Keywords: Linux distribution

The contents of your dedicated Linux server depends on what kind of Linux distribution you are using: CentOS 4, CentOS 5, Fedora 2, Fedora 4, Fedora 6, Fedora 7 or Red Hat Enterprise 4. Below is an overview of the packages deployed with your server, prior to optional control panel installation. Dedicated servers with Plesk installed will have different configurations. For more information, see the SWSOFT Plesk datasheet at <http://www.swsoft.com/r/pdfs/Datasheets/plesk.pdf>. Dedicated servers with cPanel installed will have different configurations. For more information, see the cPanel datasheet at <http://www.cpanel.net/products/cpwhm/cpanel11/cpanel11-ds.pdf>. All servers are deployed with *yum* and any vendor supplied package may be added to your system by typing: `yum install packagename`

where *packagename* is the name of the package you would like to install. The Linux rpm command can be used to list the packages that exist on your Linux dedicated server. Its syntax is the following:  
`rpm -qa --queryformat "%{GROUP} %{NAME}-%{VERSION}\n" | sort`

#### **Fedora 7 Software**

Operating System Linux Fedora 7  
OS KernelLinux kernel 2.6  
Remote Access ServicesOpenSSH 4.5p1  
Email ServicesSendmail 8.14.1  
Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 4.1.2  
Perl 5.8.8  
PHP 5.2.4  
Database and Directory ServicesMySQL 5.0.45  
DNS ServicesBIND 9.4.2  
Web Servers and ComponentsApache 2.0  
Mod\_ssl 2.2.6  
Mod\_perl 2.0.3  
Mod\_python 3.1

#### **Fedora 6 Software**

Operating System Linux Fedora 6  
OS KernelLinux kernel 2.6  
Remote Access ServicesOpenSSH 4.3  
Email ServicesSendmail 8.13  
Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 4.1  
Perl 5.8  
PHP 5.1  
Database and Directory ServicesMySQL 5.0  
DNS ServicesBIND 9.3  
Web Servers and ComponentsApache 2.2

Mod\_ssl 2.2

Mod\_perl 2.0

Mod\_python 3.2

#### **Fedora 4 Software**

Operating System Linux Fedora 4

OS KernelLinux kernel 2.6

Remote Access ServicesOpenSSH 4.2

Email ServicesSendmail 8.13

Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 4.0

Perl 5.8

PHP 5.0

Database and Directory ServicesMySQL 4.1

DNS ServicesBIND 9.3

Web Servers and ComponentsApache 2.0

Mod\_ssl 2.0

Mod\_perl 2.0

Mod\_python 3.1

#### **Red Hat Enterprise 4 Software**

Operating System Linux Red Hat Enterprise 4

OS KernelLinux kernel 2.6

Remote Access ServicesOpenSSH 3.9

Email ServicesSendmail 8.13

Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 3.4

Perl 5.8

PHP 4.3

Database and Directory ServicesMySQL 4.1

DNS ServicesBIND 9.2

Web Servers and ComponentsApache 2.0

Mod\_ssl 2.0

Mod\_perl 1.99

Mod\_python 3.1

#### **CentOS 4**

Operating System Linux CentOS 4

OS KernelLinux kernel 2.6

Remote Access ServicesOpenSSH 3.9

Email ServicesSendmail 8.13

Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 3.4

Perl 5.8

PHP 4.3

Database and Directory ServicesMySQL 4.1

DNS ServicesBIND 9.2

Web Servers and ComponentsApache 2.0

Mod\_ssl 2.0

Mod\_perl 1.99

Mod\_python 3.1

#### **CentOS 5**

Operating System Linux CentOS 5

OS KernelLinux kernel 2.6

Remote Access ServicesOpenSSH 4.3p2

Email ServicesSendmail 8.13.8  
Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 4.11  
Perl 5.8.8  
PHP 5.1.6  
Database and Directory ServicesMySQL 5.0.22  
DNS ServicesBIND 9.3.3  
Web Servers and ComponentsApache 2.0  
Mod\_ssl 2.2.3  
Mod\_perl 2.0.2cmd  
Mod\_python 3.1

### **Fedora 2 Software**

Operating System Linux Fedora 2  
OS KernelLinux kernel 2.6  
Remote Access ServicesOpenSSH 3.6  
Email ServicesSendmail 8.12  
Development Languages/EnvironmentsGCC (C, C++, Objc, GCJ) 3.3  
Perl 5.8  
PHP 4.3  
Database and Directory ServicesMySQL 3.23  
DNS ServicesBIND 9.2  
Web Servers and ComponentsApache 2.0  
Mod\_ssl 2.0  
Mod\_perl 1.99  
Mod\_python 3.1

### **Servers with Simple Control Panel**

**Sites with Simple Control Panel installed will have different configurations. Below is a list of the default configuration:<>>**

Apache 2.0  
PHP 4.3(FC2 / RHEL4 / CentOS4) / 5.0 (FC4)  
MySQL 3.23 (FC2) / 4.1 (FC4 / RHEL4 / CentOS4)  
PostgreSQL 7.4 (FC2 / RHEL4 / CentOS4) / 8.0 (FC4)  
phpMyAdmin 2.9  
phpPgAdmin 4.0  
Tomcat 5.5  
SpamAssassin 3.0  
SquirrelMail 1.4

Webalizer 2.0 **NOTE:**For information about which PHP libraries are installed on your Dedicated Server see [Which PHP libraries are installed by default on my Dedicated Server.](#)
