Keywords: mailing list Plesk

To add a mailing list in PleskLog in to Plesk as "admin." From the navigation pane on the left side of the Control Panel, select **Domains**. Select the name of the domain you want to add the mailing list to. Under Services, select the **Mail** icon. The Mail names window for that domain displays. Select the **Mailing lists** tab. Under Tools, select the **Add New Mailing List** icon. The Mailing List details page displays. Enter the mailing list details. Click **OK**. You can now add members to the mailing list by selecting the **Add New Member icon and entering the members email address**.**NOTE:** For information about enabling Mailman, see [How do I enable Mailman on my server in Plesk?](#)
