Keywords: Plesk

To set up mail forwarding on a domain through Plesk: Log in to Plesk as "admin" Under General, select **Domains**. Select the domain you want to forward mail for. Under Services, select the **Mail** icon. Under the Mail tab, select **Preferences**. The Mail Preferences window displays. Under Preferences, select **Forward to address** and enter the email address you want to forward to. Click **OK**. **NOTE:** This applies to all email addresses for this domain. For information on setting up mail forwarding on individual addresses, see [How do I set up mail forwarding for individual email addresses on a domain through Plesk?](#)
