Keywords: Bandwidth Overage Protection

**NOTE:** Bandwidth Overage Protection cannot be added to an account when it is already over its allotted bandwidth. Adding Bandwidth Overage Protection Log in to your [Account Manager](#). Under the **Hosting & Email** section, select **Dedicated/Virtual Dedicated Servers**. Next to the hosting account you want to modify, click **Launch Manager**. Under the **Support** section, click the **Bandwidth Options** icon. Select the **Change Status** checkbox. Click **Continue**. Confirm your Bandwidth Overage Protection change, and then click **Submit**.
