Keywords: Dedicated Server

It may take up to 24 hours for the server option to appear in your account. Once this option appears, follow these instructions to configure and activate your Dedicated Server. Log in to your [Account Manager](#). Select the **Hosting & Email** drop-down menu and select the **Dedicated/Virtual Dedicated Servers management** page. Click **Set up Account** next to the account you wish to configure. In the **Hosting Manager** follow the provided instructions for defining account name, user name, and password for your virtual dedicated server. Once you have finalized the setup procedure, your server will be ready in approximately 12 hours.
