Keywords: Dedicated Hosting Manager

Use the Dedicated Hosting Manager to perform basic account management, including account setup and monitoring of bandwidth usage. The Dedicated Hosting Manager also allows you to request a power cycle and submit trouble tickets for problems related to your dedicated server. To access the Dedicated Hosting Manager Log in to your [Account Manager](#). From the **Hosting and Email** list, select **Dedicated/Virtual Dedicated Servers**. Click **Launch Manager** next to the dedicated server account that you want to manage. The Dedicated Hosting Manager opens in a new window. For information on logging in to your server to perform more advanced management tasks, see: [How do I access my Windows dedicated server using Remote Desktop Connection?](#)
[How do I access the Plesk control panel on my dedicated server?](#)
