Keywords: Hosting Account

The Password Vault allows you to store all of the user names and passwords associated with your Hosting Account in a secure environment. For instance, you could store the login and password for your WordPress account and MySQL database. [To Add Passwords to the Password Vault](#) Log in to your [Account Manager](#). In the **My Products** section, select **Hosting Account List**. Next to the hosting account you want to modify, click **Open**. In the **Content** section of the Hosting Control Center, click the **Password Vault** icon. Enter your server password and click **Submit**. In the **Add New Password to Vault** section, enter the Application Name, User Name and Password you want to store in the Password Vault and click **Add**. Repeat as needed. When you are finished adding your passwords, click **Done**. [To Edit Passwords in the Password Vault](#) Log in to your [Account Manager](#). In the **My Products** section, select **Hosting Account List**. Next to the hosting account you want to modify, click **Open**. Under the **Content** section of the Hosting Control Center, click the **Password Vault** icon. Enter your server password and click **Submit**. Click the **Edit** link next to the password you would like to change. In the **Edit Password** section, make the changes to the password. When you are finished, click **Update** or if you don't want to make any changes, click **Cancel**. When you are finished editing your passwords, click **Done**. [To Delete Passwords from the Password Vault](#) Log in to your [Account Manager](#). In the **My Products** section, select **Hosting Account List**. Next to the hosting account you want to modify, click **Open**. Under the **Content** section of the Hosting Control Center, click the **Password Vault** icon. Enter your server password and click **Submit**. Click the **Delete** link next to the password you would like to delete. Click **OK** in the conformation box. The password is deleted. When you are finished deleting your passwords, click **Done**.
