Keywords: WebSite Tonight

With WebSite Tonight, you can create a Web site that is specifically designed to display on mobile devices. With a .mobi domain, you can let visitors know that your site is properly formatted for smaller screens. Using WebSite Tonight to set up your Web site for a .mobi domain, you can ensure that your site is optimized for viewing on mobile devices. Setting up your site for viewing with a mobile device is quick and easy. To Set Up a .MOBI Web Page >**NOTE:** With .MOBI domains, you can only add mobile page layouts; you cannot add traditional page layouts. Log in to your [Account Manager](#). In the **My Products** section, click **WebSite Tonight Accounts**. **NOTE:** If you want to use a free WebSite Tonight credit, you need to assign it to a domain. From the **Free Product Offers** section, select **WebSite Tonight Accounts** and then click **Use Credit**. From the drop-down list on the right, select the domain you want to use and click Continue. The account displays as a new account in the WebSite Tonight Account list. Click **Setup Account** next to the account you want to set up. Click **Next** to begin setting up your account. On the **Account Setup** page, enter your information in the following fields: Enter User Name The user name that you will use when logging in to your WebSite Tonight account. Password and Confirm New Password The password that you will use when logging in to your WebSite Tonight account. Click **Next**. Verify the domain you want to use for your site and click **Next**. Verify your account information and click **Finish**. Click **Launch WebSite Tonight**. To accept the terms of use, select **Agree**. On the Getting Started page, click **Design Web Site**. On the **Web Site Information** page, complete the following fields: Enter a default contact email address Forms submitted through your site are sent to your default contact email address Enter your company or individual name Your company or individual name is displayed in the footer of each Web page Favicon Click **Browse** to upload a favicon. A favicon (or favorites icon) is an icon that is associated with a particular Web page or site. In the **What type of site do you want to build?** area, select from the following: I want to create my Web site from scratch Allows you to design your site without any preset content added. Select a pre-built site WebSite Tonight now offers pre-built sites that allow you to select from a list of styles. Navigation buttons and page titles are automatically generated. Each page offers supporting text to guide you through building a powerful Web site. Select the type of site you want to build. In the Page Title column, you can keep the existing title, or delete it and add your own. If you are creating a Web site from scratch, you can change the page layout by clicking **Change Layout**. To add a page to your site, click **Add Page**. To continue, click **Next**. On the **Template and color** page, click the thumbnail that represents the template you want to use for your Web site. You can view additional templates by selecting from the **Category** list. In the **Select Color** area, select a color theme for your Web site. When you have selected the template and color theme you want to use for your site, click **Finish**. To publish your Web site, click Publish. To begin customizing your Web site and adding content, click **Go To Page Designer**.
