Keywords: Desktop Notifier Web-Based Email

If you installed the Desktop Notifier, you can set Web-Based Email as your default program when clicking a 'mailto' link on a Web site. For more information, see [Installing Desktop Notifier](#). **NOTE:** The Desktop Notifier is only available for Windows. To Use Web-Based Email for mailto: Links From the Windows **Start** menu, under **All Programs**, select **Web-Based Email**, and then click **Desktop Notifier**. In your system tray, right-click the **envelope icon**, and then select **Settings**. Select **Enable mailto: links**. Click **Close**.
