Keywords: QuickBooks Merchant Service

If you send Quick Shopping Cart receipts to QuickBooks using the QuickBooks Merchant Service payment gateway, you can reconcile those receipts in QuickBooks using the QuickBooks Merchant Service payment reconciliation feature. If you use a payment gateway other than QuickBooks Merchant Service, you can still configure Quick Shopping Cart to share data with QuickBooks. However, only the QuickBooks Merchant Service gateway allows you to reconcile Quick Shopping Cart credit card payments within QuickBooks. For more information on using QuickBooks, refer to the [QuickBooks Quick Start Guide](#).
