Keywords: High security settings

You may not be able to access the Express Email Marketing application because your security settings are set to High. To access the application, you can either change your security level to Medium or add the application URL to your Trusted Sites list. To Add Express Email Marketing to Your Trusted Sites In Internet Explorer, from the Tools menu, select **Internet Options**. Go to the **Security** tab. Click **Trusted Sites**. In the **Security level for this zone** box, check your security level. You may need to do one of the following: If it is set to High, use the slider to change it to a **Medium** or lower security level. If it is set to Custom, click **Default Level**, and then use the slider to change it to a **Medium** or lower security level. Click the **Sites** button. Clear the **Require server verification** check box. In the **Add this Web site to the zone** field, type <http://app.expressemailmarketing.com>. Click **OK**. On the **Internet Options** window, click **OK**.
