Domain name information cannot be found If DOMAIN.POWERHOSTER.COM, through its automated and manual processes, is unable to locate contact information for the domain administrator, the Certified Domain request is denied. Certified Domain request denied by domain administrator If the domain administrator, technical contact, or registrant rejects the Certified Domain request upon receiving a domain authorization email message, the request is denied. All recipients of the domain authorization message must approve the request. Fraud detected If DOMAIN.POWERHOSTER.COM's fraud screening for the domain in question raises valid suspicion of fraud, the Certified Domain is denied. Automated phone call cannot be completed If no valid phone number is submitted or the requestor fails to answer the phone, the Certified Domain request is denied.
