Keywords: set_up free_ad_supported_web_site

You cannot remove the ads from your Web site if you are using a free hosting account. For ad-free hosting, you must upgrade your account. To Set up Your Free Ad-supported Web Site Log in to the [Account Manager](#). Select **WebSite Tonight Accounts** from the Web Sites list. Click **Setup Account** under the Hosting Settings column for the new account that you want to set up. At the top of the Account list, next to **Free Hosting Credits**, click **Use Credit**. Set up your hosting account by entering the following information: **Domain Name**: Select the domain name you want to use for your WebSite Tonight Web site. **Enter New User ID**: Create a user name that you will use when you log in to your WebSite Tonight hosting account. **Enter New Password**: Create a password that you will use when you log in to your WebSite Tonight hosting account. **Confirm New Password**: Re-enter the password that you created. Click **Continue**. Verify your Domain Name and User ID, click **Submit**, and then close the Hosting Control Center. Return to the WebSite Tonight Accounts list in the Account Manager. Select the account you want to work with, and then click **Launch** to start creating your Web site.
