Keywords: set\_up free\_ad\_supported hosting\_account

Summary: You cannot remove the ads from your Web site if you are using a free hosting account. For ad-free hosting, you must upgrade your account.

To Set up Your Free Ad-supported Hosting Account Log in to the [Account Manager](#). In the **My Products** section, select **Hosting Account List**. Click **Use Credit** next to **Free Hosting Credits**. In Set Up Free Hosting pane on the right, select the domain that you want to associate with your free hosting account. Choose either Windows or Linux and then click **Continue**. In the Hosting Account list, click **Set Up Account** next to the New Account (Free with Domain) that you want to set up. In the **Hosting Control Center**, click **Accept** to accept the End User License Agreement. Set up your hosting account by entering the following information: **Enter New User ID**: Create a user name that you will use when you log in to this hosting account. **Enter New Password**: Create a password that you will use when you log in to this hosting account. **Confirm New Password**: Re-enter the password that you created. Click **Continue**. Verify your Domain Name and User ID, click **Submit**, and then close the Hosting Control Center.
