Keywords: Hosting Control Center hosting account password

If necessary, you can use the Hosting Control Center to change the password for your hosting account. This is the password you use to upload files to your hosting account. To Change Your Hosting Account Password Log in to your [Account Manager](#). In the **My Products** section, select **Hosting Account List**. Next to the hosting account you want to modify, click **Open**. In the **Settings** section of the Hosting Control Center, click the **Account Login** icon. To change your hosting account password, type a new password in the fields and click **Update**. **NOTE:** It may take up to 30 minutes for the change take effect.
